DETAILED ACTION

This action is responsive to the Reply dated 05/08/2008.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 05/08/2008 has been considered by the examiner.

Response to Amendment /Arguments

Applicant's arguments, see Remarks, filed 05/08/2008, with respect to the rejection(s) of claim(s) 1-17.19-21 and 63-72 under 35 U.S.C. 103(a) as being unpatentable over Paul et al. (Paul), Patent No. 2005/0047334 A1 in view of Aimoto et al (Aimoto), U.S. Patent No 6,144,636; have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of 35 U.S.C. 101 as explained below.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., In re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Independent claims 1, 63, 67, and 70 are provisionally rejected on the ground of nonstatutory double patenting over independent claims 1, 4, 11, 19, 20, 21, 22, and 23 of copending Application No. 10/777886. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, namely "methods and apparatus are provided for controlling congestion in a network such as a fibre channel network such as a congested network node can generate various instructions to control traffic flow towards a congested network node with characteristics of the congestion."

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Claim Objections (minor informalities)

4. Claims 5, 12, and 19 are objected to because of the following informalities:

Claims 5, 12, and 19 improperly depend on cancelled claims 4, 11, and 18. Appropriate

correction is required.

Conclusion

5. This action is made Non-Final. Any inquiry concerning this communication or

earlier communications from examiner should be directed to Jude Jean-Gilles whose

telephone number is (571) 272-3914. The examiner can normally be reached on

Monday-Thursday and every other Friday from 8:00 AM to 5:30 PM.
